WSIZ Copernicus Wrocław
2018 - 2022

Skills

Driving license category B

 Qualified First Aid Training (Polish KPP)

WOPR water rescuer

SITN Ski Instructor

Languages

 English B2

👤 Profile

I have been working with UX design for 3 years. While learning front-end development, I realized that I am more passionate about designing websites, applications, and graphics rather than writing a code. At that time, I was already familiar with Figma, which allowed me to begin making commercial websites for clients. Further, I expanded my knowledge by completing UX design courses on Udemy and Google UX Design certificate.

My first professional experience in UX was in Home Investments where, as an IT specialist, I designed and developed a website that gained significant traffic. This allowed me to enhance my UX skills by analyzing user behavior during typical sessions and optimizing their experience. In addition to this, I created logos, banners, and advertisements, which enabled me to offer a broader range of services to private clients.

Beyond my UX and front-end development skills, I spent 2 years at GlobalLogic working primarily with AI, training neural networks, creating prompts, and improving their performance. I also explore various AI tools as a hobby, often including AI generated visuals and other supportive resources into my design projects.

💼 Professional experience

HOME INVESTMENTS   2021 – 2024 (currently)
