_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

**NOTE: IF ANY FIRST COUSINS ARE ALIVE, YOU MAY STOP.**

12. The more remote degrees of kinship are determined by counting the number of steps in the chain from the claimant to the closest common ancestor of the claimant and the decedent, and from said ancestor back to the decedent. The sum of the two chains is the degree of kinship. The surviving relatives who have the lowest sum are in the nearest degree and thus inherit the estate equally.
