## **Configuring PTT Settings and Sound Effects**

This guide provides essential instructions for configuring Push-to-Talk (PTT) settings and sound effects, ensuring optimal audio quality and customizable features for your radio communication. By following the steps outlined, users can easily adjust their time zone, select distance units, set up a convenient transmit key, and personalize sound effects. This enhances the overall user experience, making it more efficient and enjoyable. Whether you're a novice or experienced user, this guide streamlines the setup process for better functionality.

Select the time zone you are located in or leave as 'System Time Zone' to let your browser automatically adjust for you.
