

Installation Item

Envirofill 12-20 Turf Infill

Application:

Turf Infill for Lawns, Pets, & Playgrounds.

Info

It's Cleaner:

Microban® antimicrobial protection is infused into Envirofill during the manufacturing process to help prevent the growth of bacteria, mold, and mildew that can cause stains, odors, and product deterioration.

Inhibits pet urine odor:

Microban significantly reduces pet urine odors by up to 99%. Microban has been scientifically proven to disrupt the bacteria process that converts pet urine into ammonia odor. So be assured, Fido can go about his business worry-free.

Performance:

Envirofill is highly rounded, keeping your infill from compacting over time. This will give your playground a better cushion similar to a natural surface area. Envirofill doesn't migrate and provides a consistent, level surface, even in high traffic areas.

Aesthetics:

Your playground will be the envy of the neighborhood. Envirofill's emerald green color will blend into your turf fibers giving you the beautiful lush appearance of a natural play area.
