# TABLE GAMES SIC BO DICE

## Serial Numbers

To prevent 'weighted' or 'loaded' dice a unique serial number is added on each set of dice. TCSJOHNHUXLEY's dice are packaged in packs of five with a matching serial number on each die, to ensure that all the same dice are used in the game. If any die are swapped out a member of staff will easily be able to see if two different serial numbers are in play.

## Logos

A casino's logo can be added for personalization as well as adding a clear unique identifier to the dice. The colour of logos can also be changed to add another level of variation.

## Key Letter Spot

This is a security measure that often goes unnoticed by players. A designated spot on each die can be monogrammed with a letter or number prior to painting. The monogram adds another level of security that is hard to replicate.

## Perfect Cubes

Dice used in casinos are often known as precision dice because they are formed in the shape of a perfect cube with edges and corners perfectly square. "Certified Perfects" branded dice adhere to the highest of standards, achieving precision and accuracy with incredible craftsmanship. Each side of a die is perfectly flat, and the spots contained are perfectly flush to ensure no imbalance.

# TABLE GAMES SIC BO DICE

In casino table games, sic bo dice are three six-sided dice used in the game of sic bo , also known as tai sai, dai siu, big and small, or hi-lo.

Casino table games sic bo dice

Here's what you need to know about them:

**Design:** These dice are typically plain white with black pips (dots) indicating the number rolled on each side. Some variations may have different colors or designs.

**Material:** They are usually made of plastic, acrylic, or bone . Casinos often use dice made of more durable materials to withstand frequent use.

**Handling:** The dice are typically shaken in a small bowl or container before being thrown onto the table. This ensures randomness and prevents players from manipulating the outcome. Electronic Dice Shakers are used.

**Bets:** Players place bets on what combinations of numbers will appear on the dice after the roll.

Here are some additional details about sic bo dice:

**Values:** Each die has values from 1 to 6.

**Combinations:** There are 216 possible combinations of three dice (6 possibilities for each of the three dice).

**Special Dice:** Some casinos may use dice with a "joker" face that can represent any number. This adds another layer of excitement and complexity to the game.

**Regulations:** Casinos have strict regulations regarding the size, weight, and fairness of sic bo dice. These regulations are in place to ensure that the game is fair for all players.
