

KBG ELECTRIC PRIVATE LIMITED

Experts in Electrical Control & Power Panels

Complete Electrical Panel Solutions From Concept to Commissioning

KBG Electric Pvt. Ltd. is a trusted industry leader specializing in delivering turnkey solutions for control panel requirements.

We offer a comprehensive range of services and high-quality products designed for safety, efficiency and long-term performance.

KBG
KBG ELECTRIC
the true power

Electrical Automation Systems

With a focus on precision engineering, quality assurance, and customer satisfaction, we cater to diverse sectors such as power distribution, Manufacturing, HVAC, Infrastructure, Data Centre & process industries.

Powering Excellence Through Values, Teamwork & Innovation

KBG ELECTRIC Pvt. Ltd.

Experts in Electrical Control & Power Panels for Industrial, HVAC and Infrastructure Projects

Driven by VALUES. Powered by INNOVATION.

At KBG Electric Pvt. Ltd., we believe that excellence in engineering is built on a foundation of strong values, committed teamwork, and forward-thinking innovation. Since our inception, we have focused on delivering high-quality electrical panel solutions that serve the evolving needs of industries across India.

We are not more than just manufacturers—we are partners in our client's progress. Our approach combines technical expertise, hands-on experience, and a deep understanding of project demands to deliver reliable, performance-driven solutions.

Our Philosophy

We are committed to exceeding customer expectations by offering efficient, cost-effective, and customized electrical control panel systems. Our business is built on long-term relationships, trust, and a dedication to continuous improvement in everything we do—from design and production to service and support.

Mr. Krishna B. Gawade, Founder and CEO of KBG Electric Pvt. Ltd., brings over 20 years of extensive experience in electrical engineering. A dynamic leader and project execution expert, he has led numerous projects in Power Distribution, HVAC, Process Industries, and Automation. His commitment to quality, innovation, and social responsibility shapes the company's vision and inspires the team to deliver excellence at every step.

OUR CORE VALUES

Integrity

We act with honesty & uphold the highest ethical standards.

Innovation

We embrace technology & strive for continuous improvement.

Commitment

We build trust through transparency & reliability.

Quality

We never compromise on performance & safety.

Collaboration

We grow through teamwork, partnerships & shared success.

PRODUCT

Reliable. Customized. Standards-Compliant.

KBG-TECH Technology-Based Panel

Innovative control panels equipped with advanced features and intelligent protection for critical applications. Welcome to our latest introducing New Generation of the 'KBG-TECH' Technology Based Panel by KBG Electric! Discover the cutting-edge technology and digital efficiency brought to your operation with our advanced Technology based LV Switchboard. As a leader in the digital transformation of energy management and automation, KBG Electric proudly presents the next-generation KBG-TECH' low voltage switchboard. Our state-of-the-art design ensures superior operational safety in high-performance LV power applications.

KBG-SVC Panel

LED & LAG POWER FACTOR SOLUTION WITH STATIC VAR COMPENSATION PANEL.

Static VAR Compensator panels designed for reactive power management and improved power quality. This is a robust solution of Led Power Factor. (Inductive Load) this is integrated with old Capacitor Panel. Inductive Load Drivers are used with new generation power factor controllers. This Product is available in kVar rating with Inductive Load Drivers can drive 3 pcs. mono-phase shunt reactors, and powers of these reactors, each of which is connected to a different phase can be separately controlled independently in a way to offer desired power. This product is use in were as A dusty environment & poor power quality.

IEC 61439 Type-Tested Panel (TTA)

Panels built and tested as per IEC61439 standards, offering assured performance, safety, and longevity.

PRODUCT

Reliable. Customized. Standards-Compliant.

Drawout Motor Control Centre (MCC) Panel

Modular, space-efficient panels for controlling multiple motors with ease and flexibility.

Motor Control Centre (MCC) Panel

Centralized panels for motor operation, protection, and control with high fault-level capacity.

LT PCC & Synchronizing Panel

Low Tension Power Control Centers and Synchronization Panels for managing main and standby power supplies effectively.

Outdoor IP-65 Rated Panels

Weatherproof panels designed to operate reliably in harsh and outdoor environments.

PRODUCT

Reliable. Customized. Standards-Compliant.

Fire Fighting Control Panels

Panels configured to support fire detection, suppression systems, and emergency operations.

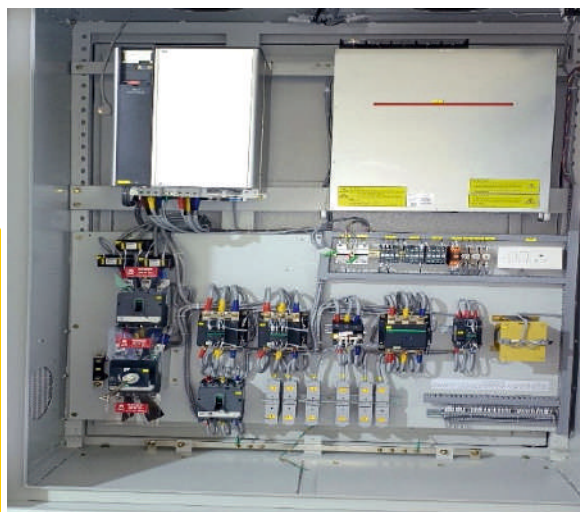

APFCR Panels (Conventional & Hybrid)

Automatic Power Factor Control and Correction panels, both conventional and hybrid types, to ensure efficient power usage.

VFD & AHF Panels

Panels equipped with Variable Frequency Drives and Active Harmonic Filters to control motor speed and reduce harmonics.

Instrument Control Panels

Custom panels for monitoring and controlling instrumentation across industrial processes.
