perché scegliere noi?

WHY CHOOSING US

Rappresentiamo il "Vacuum" nel mondo da oltre 38 anni

We have been representing "Vacuum" in the world for over 38 years.

Nous représentons le "Vacuum" dans le monde entier depuis 38 ans

Representamos el "Vacuum" en el mundo desde más de 38 años

2 Abbiamo da sempre mantenuto invariato un principio: essere produttori di vuoto

We have always maintained unchanged an important principle: to be manufacturers (in all its senses) of vacuum packing machines

On a toujours gardé le même principe: "être des producteurs du vide"

Desde siempre hemos mantenido invariado un valor: somos fabricantes de envasadoras al vacío

3 Produciamo apparecchiature innovative per soddisfare tutte le richieste della clientela più esigente

We produce innovative equipment to fully meet the most demanding customers' requests

On fabrique des machines innovantes pour satisfaire les clients les plus exigeants.

Fabricamos aparatos innovadores para satisfacer las solicitudes del cliente más exigente.

THE ITALIAN VACUUM MAKERS

CVS Series - Sous vide cooking

PANNELLO COMANDI / CONTROL PANEL

perchè scegliere un'apparecchiatura di questa linea?

WHY CHOOSING A COOKING SYSTEM OF THIS LINE?

1 Mantenimento proprietà nutritive dell'alimento confezionato
Maintenance of the nutritive properties of the packed product

2 Aumento morbidezza e succosità dei cibi
Increased softness and juiciness of the food

3 Riduzione "del calo peso"
Weight loss reduction

Sistema di cottura sottovuoto a bassa temperatura

LOW TEMPERATURE VACUUM COOKING SYSTEM / SYSTÈME DE CUISSON SOUS-VIDE À BAISSE TEMPÉRATURE / COCCIÓN AL VACÍO DE BAJA TEMPERATURA

Innovativo sistema di cottura a bassa temperatura. Il ciclo di lavoro si distingue in due fasi:

1. Impostazione temperatura desiderata dell'acqua in vasca (di norma non superiore a 60°/65°)

2. Impostazione tempo di cottura.

La staticità dell'acqua in vasca, unitamente alla temperatura costante permettono una cottura del prodotto confezionato senza eguali.

Innovative low temperature cooking system. The work cycle is divided into two phases:

1. Setting the desired temperature of the water in the tank (normally not higher than 60°/65°)

2. Setting of the cooking time.

The static water in the tank together with the constant temperature permits a cooking system with no better comparisons!

C'est un système de cuisson sous-vide à basse température hautement novateur, dont le cycle de travail est divisé en deux phases:

1. Réglage de la température souhaitée pour l'eau présente dans la cuve (normalement pas plus de 60°/65°)

2. Réglage du temps de cuisson.

La nature statique de l'eau dans la cuve ainsi que une température constante permettent d'obtenir une cuisson de vos produits sans égal.

Sistema de cocción innovador al vacío a baja temperatura. El ciclo de trabajo se distingue en dos fases:

1. Ajuste de la temperatura deseada del agua en la cuba (normalmente sin exceder los 60°/65°C)

2. Ajuste del tiempo de cocción.

El agua estática en el tanque junto con la temperatura constante permite cocinar el producto envasado sin igual.
