Commercial Vertical Contact Toaster Electric PFEKM-40

Model# PFEKM-40

Product Description

Commercial Vertical Contact Toaster Electric

Product Description

The stainless steel metal conveyor belt helps to better transfer heat to buns while minimizing marks left by the toaster, so you get the perfect brown every time. It is also easy to remove, allowing for effortless and thorough cleaning. Use the menu shortcuts to quickly switch from one menu item to another, saving prep time and reducing your customers' wait time! Program the toaster with your most popular recipes to improve consistency and ensure customer satisfaction.

Standard Features

• Vertical design of the machine, saves kitchen space;
• The machine is closed on all sides, with horizontal wind direction, heat dissipation is slow and heat preservation effect is good;
• 21 seconds fast heating, can meet unlimited and continuous supply of bread; • Built-in energy-saving thermostat to save energy during off-peak hours;
• With automatic power protection function, the power can be cut off quickly in case of failure to ensure personal safety;
• Made of high quality materials and assembled in strict accordance with quality standards. The machine has been tested in the factory to ensure reliable and trouble-free operation

Hamburger roaster
