

Piston filler ALD-M series for stick bags

Application

Used for the the dosing of liquid products with different viscosity. Usually equipped with a VFFS machine AM014, but could be also arranged as a semi-automatic filling station.

Features

- **Mechanical** volume adjustment.
- Up to **30 doses per minute** (per channel).
- **Pneumatically** driven.
- **Maximum channel** number- 2 channels.
- **Stainless steel**
- Intake hopper with a **water jacket** for product heating

Suitable products:

Honey

Ketchup

Jam

Technical specifications:

Construction	Stainless steel AISI 304
Productivity	Up to 0 doses per minute (per channel)
Overall dimensions in mm(L*W*H)	Depending on the required volume
Weight	60kg
Control	CPU
Drive	Pneumatics
Power supply	220V ± 10%
Installed power	2100W (if hopper is with heating)
Air consumption	20L per minute
Dosing range	In the range of 5-50ml
