R.N Podar School

📅 2018 – 2019   📍 Mumbai, IN

- 97% (CBSE)

PROJECTS

Namaste India

https://nityagupta6.github.io/SIH/

- Namaste India is an informative website that helps avoid incidents related to tourist overcharging, duping and overall lack of information for tourist safety and security checked at various service providers.
- Wrote the frontend for this project using **HTML**, **CSS** and **JavaScript**, and helped my teammates with making commits and contributions using github for this project.
- **Source code:-** https://github.com/Adi-R12/SIHProject/graphs/contributors

Vardan

https://nityagupta6.github.io/amigurlz_shehacks.github.io/

- This is a website that brings both blood donors and recipients on a single platform and makes the experience of blood donation as well as receiving a more easy process. So, the need for blood is no longer a reason for demise.
- It is made using **HTML**, **CSS** and basic **JavaScript**. This is my first website, made in a group for a hackathon.
- **Source code:-** https://github.com/nityagupta6/amigurlz_shehacks.github.io

COURSE WORK

Introduction to Programming

Data Structures and Algorithms

- -

Digital Systems and Design   Microprocessor Interface

Analog Electronics
