FINOAK RUSTIC - CUSTOM STAINED TO CLIENTS SPECIFICATIONS

Our Ethos

Natural wood is one of the most adaptable and design friendly finishes that you can have in your home or office, which is why it is our aim to continue to bring you technologically innovative wooden flooring solutions to beautify your living spaces.

We are proud to have introduced CobbleClad which is a Natural Stone carpet to our portfolio which holds all the natural feel nature has to offer.

To do this, our company is committed to the sustainable sourcing of natural wood. Not only do we have a responsibility to our customers, but we also have a responsibility to our environment. Correctly sourced wood is one of the most renewable resources known to man.

Inspired by nature, our flooring uses the skill of man to create a product which is environmentally friendly, long lasting, and safe for you and your family.

Our Journey

We pride ourselves in excellent customer service, quality products and professional installations.

With over 29 years of experience our knowledge of flooring is unsurpassed.

Floorsmiths (Pty) Ltd guarantee the quality of product from purchase through to installation. Each manufacturer holds their own warranties.

Flooring Ranges

Solid Engineered Wood flooring

For decades, solid wood has been considered a luxury item to install in the home or office. This is due to its timeless elegance that are not dictated by fading fashion trends. A quality solid wooden floor will last you years to come and increase the value of your home.

Advantages of Solid Engineered Wooden Flooring

Environmentally Friendly – Less precious wood is used in the manufacture.

Pre-finished – installations are quicker and can be walked on immediately.

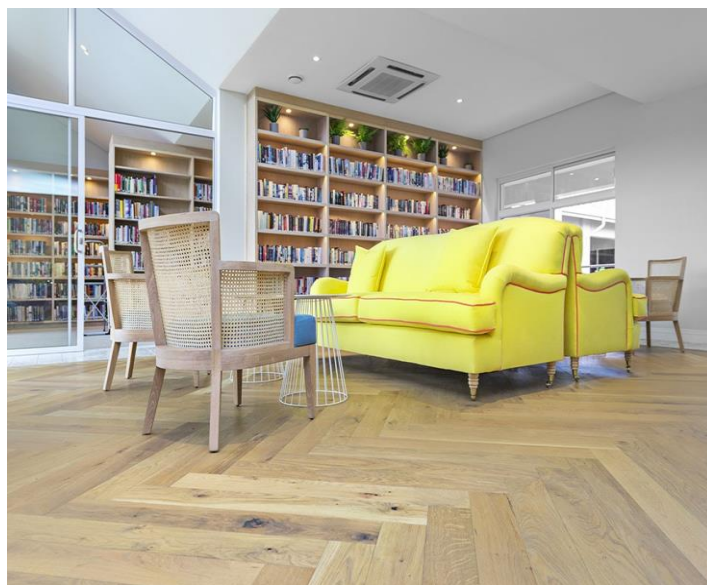

Long lasting – Planks can be sanded up to 3 times in their life cycle.

Stable – Rigid planks that don't warp/bend as easily as solid timber flooring.

Locking System – Tight fit ensures water is less likely to penetrate and allows for the floors to be removed and re-installed if damaged or required.

FSC certified – Forest Stewardship Council is an international non-profit, multi-stakeholder organization established to promote responsible management of the world's forests.

At Floorsmiths (Pty) Ltd we take flooring seriously, therefore we are the only supplier and installer that has products that outlived their original warranty. All flooring we supply comes with a written 10–30-year surface wear warranty.

Laminate flooring

Laminate Flooring is a multi-layer synthetic flooring material that is fused together in a lamination process. This type of flooring imitates the look of wood with a photographic print layer under a clear protective film.

Advantages of Laminate Flooring

Easy installation – Simply click together, saving you precious time.

Variety – We offer a wide range of beautiful, high quality laminated flooring.

Cleaning is easy – Simply dust or vacuum followed by a damp mop or cloth.

Hypoallergenic – As it does not absorb dust or promote growth of dust-mites and micro-organisms.

Affordable – Laminated flooring costs a fraction of the price of real wood. This afford-ability has led laminate flooring to become one of the most chosen materials for home and office use.

Vinyl flooring

Vinyl flooring is synthetic flooring that is available in tile form. It is a manufactured rigid core board that is then treated with a decorative layer of vinyl that gives it the look you desire, such as a hardwood floor appearance. Afterwards, a transparent protective layer is then applied to ensure your vinyl floors are durable and stain resistant.

Advantages of Vinyl Flooring

Soft surface – Vinyl Floors offer a softer surface than other flooring options making it quieter underfoot.

Variety – Floorsmiths (Pty) Ltd offers a wide range of vinyl planks.

Long lasting – Vinyl Flooring is extremely durable and is well known in the flooring industry to stand the test of time.

100% topical water-proof – Making it easier to clean and maintain.

Trouble free maintenance – All you need to do is sweep and mop.

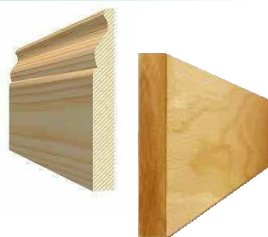

Vapor and screed

Mapei Ultraplan Eco 20 is a single-component high performance self-levelling and smoothing underlayment compound manufactured from rapid-setting shrinkage compensated cement and selected aggregates.

Skirting and architrave

Floorsmiths (Pty) Ltd supplies and installs solid wood Skirtings and Architrave (used around doorways) in a choice of styles or profiles. Solid wood skirtings and architraves finish off and add a touch of class to any room and can be used with any floor type – solid wood, screed, carpets or tiles.

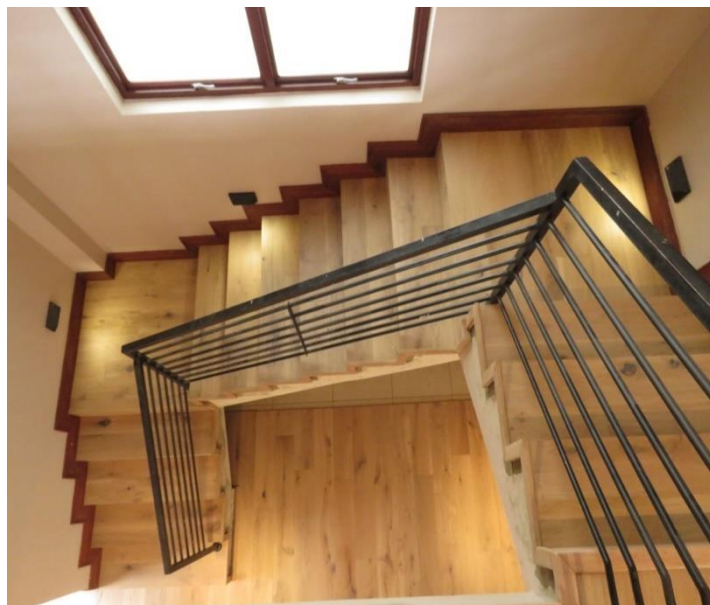

Restoration of Flooring

Wood flooring is highly sought after, as it's durable and beautiful. But over time, wear and tear can take its toll, particularly in areas with high foot traffic. Luckily, unlike tiles and carpets that need to be replaced once damaged, you can bring your wood floors back to life with floor sanding. If your wooden floors are in poor condition, consider restoring them to their former glory.

Staircase

We supply and install.

- Fully wrapped treads and risers
- Single treads with painted risers
- Floating box treads

Choose from a wide range of timbers to suit not only your taste but also your budget.

CobbleClad

CobbleClad is a new way to decorate your walls, floors, patios, and swimming pool areas to create a functional barrier and can be made into a Seamless floor, highly durable making CobbleClad perfect for indoor or outdoor applications. CobbleClad can be applied directly over tiles. Benefits include hygienic, scratch, stain, impact and slip resistant.

Available from fine to 6mm stones in all natural colours.
We do not tumble or use polished stones.

Aqua EverDry cont....

Seals the walls and the floors, preventing seepage.

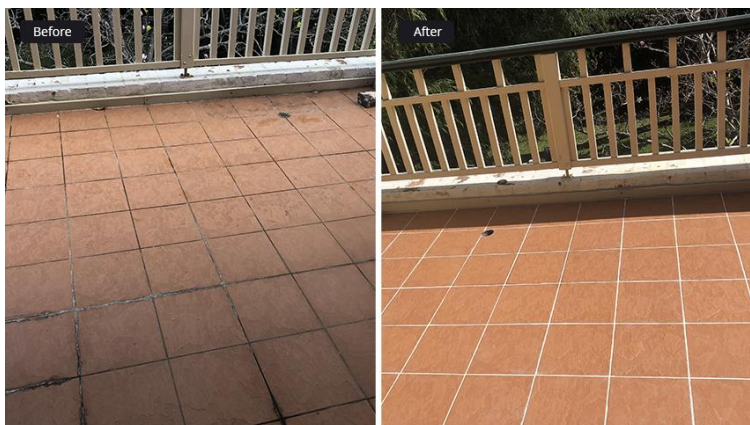

Residential Epoxy Coatings

Aqua EverDry

Aqua EverDry is a cost-effective solution to seal your porous surfaces that are seeping water. This system saves you from having to replace the bathroom or even patio tiles therefore saving you countless hours and rands. This system is a 3-coat system which prevents water seeping through to your sub structure. The product is UV stable and environmentally friendly.

No harsh chemicals are used in the manufacturing process making this product water soluble, yet durable on surfaces. When sealing showers, there is a non-slip option available which has a very fine silica type substance within the product to prevent further nonslip properties.

An epoxy floor may add value to your home, is easy to clean, and offers your concrete floor a distinctive and attractive appearance. It's also popular due to its water and chemical resistance property and durability. Also, choosing residential epoxy flooring for homes has other benefits as well. They are super easy to maintain and clean. can be installed in various designs, colors, and patterns, no floor will ever look the same.

- Metallic Epoxy Floors
- Quartz Epoxy Floors
- Mortar Coating Epoxy Floors
- Self-Leveling Epoxy Floors
- Custom Flake Epoxy Floors

Many colours to choose from, we only use quality products in all of our applications, from floor preparation to the finished product.

Epoxy Countertops

Apart from flooring, Epoxy can be applied to many surfaces such as counter tops and even walls.

Epoxy can give any countertop a makeover without having to replace it completely. In only a few days, it can reinvigorate any out-of-date outdated, pitted, or simply unsightly countertops. Epoxy Tops are easy to clean and resistant to stains.

Epoxy Flooring Commercial

Epoxy flooring is extremely durable making it ideal for hi-traffic areas, heavy machinery / and frequent spills. Epoxy flooring is both functional and visually appealing.

Our Epoxy Flooring is seamless, making it easy to clean and maintain, and comes in a variety of finishes and colours to complete your company's brand and look. Epoxy Flooring is also long-lasting, inexpensive, and resistant to chemicals and germs, making it suitable for commercial facilities that must adhere to strict sanitary standards.
