quickdraft

DOCUMENTATION PARTNER
Professional and Reliable Technical Documentation Services
for Defence Manufacturers

About US

QuickDraft LLP is a technical documentation company located in Pune, India. We help companies prepare professional quality technical documentation for products manufactured for Defence.

Why Choose Us?

QuickDraft's founders, having worked with several companies, domains, and tools, have gained relevant industry experience over the years.

This exposure helped us:

- ➡ Develop a custom documentation site with the right features
- ➡ Provide relevant and useful documentation that adds value to your product.
- ➡ Incorporate the right processes and standards to provide top quality documentation

Our Services

Documentation, graphics, videos, and animation for defence products and applications:

INTERACTIVE TECHNICAL MANUALS (IETM)

It comprises volumes of text into just storage devices or online pages which may include sound and video and allow readers to locate needed information rapidly than in paper manuals.

PRINTED MANUALS

Traditional approach to prepare manuals in a book format, which will be printed so that users perform the operations by reading these manuals.

VIDEOS & ANIMATIONS

Acts as a supporting aid to help users see the actual operation of the system in video format.

Tools Expertise

quickdraft

The custom documentation site that we offer includes a full range of features to create and publish your IETM documentation.

The custom documentation site includes the following **IETM** features

User Management	Private Topics	Modules
Only authorized users have access to documentation	Make the entire documentation or topics private and accessible only by authorized users	Segregate the topics in the documentation by product, version, and type
Secured Database	**Advance Search**	**Version Controlling**
Store and retrieve the documentation from a secure backend database	Search the required information in the documentation by word, phrase, or sentence	Each topic gets a new version automatically when it is modified
Image Viewer	**Hyperlinking**	**Image Hotspot**
Zoom in and Zoom out the images and also view meta data	Hyperlink images, words, and icons to any internal topic or external resource	Include hotspots in product images or photos to view details for specific sections
In-line TOC	**Tagging**	**Interactive Glossary**
Easily navigate to headings inside a topic	Tag the topics to organize the content and access easily with a single click	Add terms and their definitions to the documentation and link them to the content in the topic
